

## **EvolveFM 2012.8.20 Release Notes**

The biggest improvement to EvolveFM in the 2012.8.20 release is the addition of the Maintenance module. This is a separate pay per use module designed to meet your CMMS needs.

As with each quarterly release we've also fixed a number of bugs and added/updated some existing features.

Pay special attention to the install guide on this release as it has changed in the area of IIS Request Filtering and Enabling of Parent Paths.

Also note the Evolve.inc file is new so you may NOT copy your existing .inc file into its place.

If you are using the included script to upgrade your database you MUST be on the 1.0 2012.5.1 version of EvolveFM.

### **New Features**

- Maintenance
- Call Center
- Requester

### **Feature Updates**

- Space- Move in/move out/history displayed on space dialog
- UDA shared procedure redone to automatically rewrite underlying views
- UDAs added to themes

### **Bug Fixes**

- Corrected dialogs appearing in incorrect language
- UDA checkboxes updating when added through spreadsheet
- Home page history will no longer return removed records
- Reports-Report Permissions for functional groups fixed
- Reports-Importing Reports via grid fixed
- Platform Admin – incorrect tier 1 errors during import fixed
- Platform Admin – MAXDOP added to advanced imports
- Drawings – Entity Handles not updating fixed
- Drawings – Right panel overflow fixed so scroll bar will appear

- Drawings – If drawing import fails to complete check for duplicate active drawings will still happen to insure only one drawing per type per location.
- Drawings- Attribute mapping error if added without priority fixed
- Drawings- Labels will no longer try to display inactive records
- Drawings- Sort by uploaded date fixed
- Drawings – Object groups will no longer be created if they are not included during conversion
- Drawings- Label controls are now available if tools are minimized
- Drawings – Planned headcount updated from null at drawing activation if it has no value
- Drawings – Edit labels command remains active until you select a new tool command
- Documents- Documents now saving uploaded by and upload date correctly
- Chrome- Platform Admin left menu functions properly now

## Files

Copy the following before deleting your Current EvolveFM Files but DO NOT overwrite the new files with your backups transfer the paths between the two as the Evolve.Inc has been updated

\Evolve\Json\Evolve.inc

\Evolve\web.config(if you are using LDAP)

\Evolve\modules\Reporting\ReportViewer\web.config

And the following folders

\Evolve\drawings

\Evolve\documents

\Evolve\user\_images

\Evolve\modules\Reporting\RDL

- After backing up delete all files under Evolve
- Copy all files under EvolveFM Release 2012.8.20\Server Files to your evolve installation

## Server Scripts

If you update via script you DO NOT need to restore either DB included with this build

- Update 2012.8.20
  - \*\*DO NOT run this if you haven't already run the Update to Evolve 1.0.2012.5.1 script against your current DB you can determine this by looking at the release info in the lower right hand corner of the EvolveFM screen and seeing if the release info there matches the script name
  - Before running this script on your SQL Server, make a backup of your current database.
  - Script out any custom views.
  - Run this script on SQL Server to update the Evolve database to 2012.8.20 release.

## Image Generator

- Evolve Image Generator.msi(only necessary to install if not done for the previous release)
  - Open Evolve Image Generator.msi
  - Follow instructions in the Install Guide
